INTERNATIONAL PRELIMINARY R	REPORT ON PA	TENTABILITY
-----------------------------	--------------	-------------

International	appl	ication	No.

PCT/US04/00452

Box No. I Basis of the report
1. With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.
This report is based on translations from the original language into the following language which is the language of a translation furnished for the purposes of:
international search (under Rules 12.3 and 23.1(b))
publication of the international application (under Rule 12.4)
international preliminary examination (under Rules 55.2 and/or 55.3)
2. With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):
the international application as originally filed/furnished
the description:
pages 1-13 as originally filed/furnished
pages* NONE received by this Authority on
pages* NONE received by this Authority on
the claims:
pages 14-16 as originally filed/furnished
pages* NONE as amended (together with any statement) under Article 19
pages* NONE received by this Authority on
pages* NONE received by this Authority on
the drawings:
pages 1-5 as originally filed/furnished
pages* NONE received by this Authority on
pages* NONE received by this Authority on
a sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing.
3. The amendments have resulted in the cancellation of:
the description, pages None
the claims, Nos_None
the drawings, sheets/figs None
the sequence listing (specify): None
any table(s) related to the sequence listing (specify): None
4. This report has been established as if (some of) the amendments annexed to this report and listed below had not been made since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).
the description, pages
the claims, Nos
the drawings, sheets/figs
the sequence listing (specify):
any table(s) related to the sequence listing (specify):
* If item 4 applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY RE	EPORT ON PATENTABILITY
------------------------------	------------------------

International application No. PCT/US04/00452

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement				
1. Statement				
Novelty (N)	Claims	1-14	YES	
Hovery (14)		NONE	NO	
			3770	
Inventive Step (IS)		NONE	370	
	Claims	1-14	NO	
TANKET A	Claims	1-14	YES	
Industrial Applicability (IA)		NONE	NTA 1	
Claims NONE 2. Citations and Explanations (Rule 70.7) Claims 1-14 lack an inventive step under PCT Article 33(3) as being obvious over Fujibayashi (US-4,536,808). Regarding claims 1-14, Fujibayashi in Fig. 2 discloses a conventional auto-on/off circuit and method thereof for an audio device that including a PET Q1 adapted to pinch off charge carriers; a capacitor C1 connected to the FET for charged and discharged; an audio sensing comparator can be read on with the self-holding condition transistor Q2 and capacitor C2 adapted to threshold level consideration and charging and discharging control of the capacitor C1 for auto-on or auto-off control of the audio diverse. The changing states of the capacitor C1 would have changed the on/off state of the audio device. What's not taught by Fujibayashi is the circuit is being used with a wherese transmiter having an audio plug or the audio source selecting group. It would have been obvious to one of ordinary skill in the art to utilizes the conventional auto-on/off circuit as shown by Fujibayashi for connecting to different kinds of audio sources or devices as claimed to provide automatic on/off control for the simple reason of power saving, for example. Furuta, Butler, and Goto et al are cited as pertinent art to the instant application. The 3 cited references disclose various auto-on/off circuits for controlling electronic devices. Claims 1-14 meet the criteria set out in PCT Article 33(4), and thus meet industrial applicability because the subject matter claimed can be made or used in industry. None None Form PCT/IPEA/409 (Box No. V) (January 2004)
